

Swaraj Dalvi

+91 9004527484 — swarajdalvi0@gmail.com — LinkedIn — Github

Summary

Aspiring Software Engineer and Third-Year Engineering student with experience in web development, hackathons, teaching, and team leadership. Skilled in C, C++, Java, Python, HTML, CSS, and modern frontend technologies.

Education

BTech Engineering	CGPA: 9.16 (up to 3rd Semester)
Higher Secondary Certification (Science) Maharashtra Board, 2024	81.17%
Secondary School Certification Maharashtra Board, 2022	94.40%

Projects

Zydura Healthcare Website	Freelance Project
- Developed a responsive multi-page marketing website for a dermatological company. - Built an interactive product catalog using HTML, CSS, and JavaScript with flip-card animations. - Implemented mobile-first responsive design using Flexbox, Grid, and media queries. - Integrated AOS animations and created a clean UI with sticky navigation. - Live Website: www.zydura.in	
Kerala Tourism Hub (Hackathon Prototype)	
- Led a team to develop a tourism-focused web application using React, TypeScript, and Vite. - Built responsive UI components using Tailwind CSS and shadcn-ui. - Implemented tourist dashboard, photo galleries, search functionality, and client-side routing. - Utilized AI-assisted development tools to accelerate development.	
Jharkhand Eco-Cultural Tourism App (Hackathon Prototype)	
- Led development of a full-stack tourism platform with separate workflows for tourists and locals. - Developed Responsive Dashboards for Tourists and Locals - Developed responsive UI using Tailwind CSS and shadcn-ui. - Utilized AI-assisted development tools to accelerate development.	
Academic Projects	
- Simple Online Voting System using C. - Online Shop Billing System using Java. - Food Distribution Management System using Python and GUI.	

Research Publications

An Integrated Digital Governance Model for Sustainable Eco-Cultural Tourism Paper (Accepted)	IEEE Conference
- Proposed the Integrated Digital Governance Model (IDGM), a digital platform for sustainable tourism governance, community participation, and environmental compliance. - Designed a modular architecture incorporating content verification, offline-first connectivity, governance monitoring, and equitable benefit distribution. - Performed literature review and research-gap analysis across eco-tourism, digital governance, and sustainable development frameworks. - Developed concepts for AI-assisted moderation, carrying-capacity enforcement, and transparent community revenue-sharing mechanisms. - Evaluated the framework through simulated deployment scenarios, demonstrating improved accessibility, governance transparency, and stakeholder participation.	

Leadership & Activities

SAKEC Student Chapter of Association for Computing Machinery (ACM)

- Head of Infrastructure and Disciplinary Department.
- Coordinated event logistics and managed team operations.
- Contributed to creative planning and execution of technical events.

Speaker's Club of SAKEC

- Head of Website Team.
- Designed a modern Website for the club.

Teaching Experience

- Taught Mathematics to students of Standards VIII–X at Vaishali Tutorials.
- Taught Physics to students of Standards XI–XII at Vidya Science Academy.

Technical Skills

Languages: C, C++, Java, Python

Web Technologies: HTML, CSS, JavaScript, React, TypeScript

Tools: Git, MS Excel, MS Word, PowerPoint

Frameworks/UI: CSS

Certifications

- AWS Academy Graduate – Generative AI Foundations
- AWS APAC – Solutions Architecture Job Simulation
- Accenture Nordics – Consultant Job Simulation
- Accenture Nordics – Software Engineering Job Simulation
- Deloitte Australia – Data Analytics Job Simulation
- Deloitte Australia – Cyber Job Simulation
- Accenture UK – Developer and Technology Job Simulation
